

# GAINED WEIGHT AND STILL ALL MUSCLE

INTRODUCING THE NEW MT4 SERIES WITH UP TO 73 HP

**LS** Tractor  
Start Blue. Stay Blue.

When we set out to upgrade the MT4 Series, we were inspired by the place owners spend the most time: Behind the wheel. What we found there led us to increase overall weight by 400 pounds and to optimize weight balance for better stability than our previous model. Beyond this, the new MT4 offers superior loader lifting capacity, too. Now with a new 73HP engine option in either cab or ROPS models, the MT4 delivers more where it counts.
